Index to volume 23 1990

No 1 February 1–64
No 2 April 65–160
No 3 June 161–224
No 4 August 225–288
No 5 October 289–368
No 6 December 369–448

Articles

A chemical study of wear particles and other features associated with the wear of ceramics
H. Arbabi, J.F. Watts and J. Briggs 235

A comparative study of the thermal behaviour of profile bore bearings
S. Basri and D.T. Gethin 265

A fast arrest and freeze wear test – a new tribological testing technique
B.J. Griffiths 277

A forward iterative numerical method for steady-state elastohydrodynamically lubricated line contacts
Yang Peiran and Wen Shizhu 17

A kinetic study of interface reactions for an organic molybdenum compound as a lubricant additive
Y.-M. Sun, S.-J. Jang, L.-Q. Zheng, K.-L. Tang and D.-D. Wu 438

A reciprocating wear test for evaluating boundary lubrication
J.S. Sheasby, T.A. Caughlin, A.G. Blahey and K.F. Laycock 301

A review of the influence of environmental humidity and water on friction, lubrication and wear
J.K. Lancaster 371

A study of N, O and S heterocyclic compounds as extreme pressure lubricant additives
T. Singh, R. Singh, V.K. Verma and K. Nakayama 41

An experimental simulation of the tribology of large spherical roller bearings in paper machines
S.D. Fysh, E.M. Oravec and J.B. Medley 317

An investigation into the numerical solution of Reynolds' lubrication equation with special reference to thrust bearings
E. Koç 429

Application of space tribology in China
Wei Leyu and Huang Kewei 142

Application of space tribology in Japan
M. Nishimura 143

Applications of space tribology in the USA
P.D. Fleischauer and M.R. Hilton 135

Characterization and simulation of wear occurring in the cylinder bore of the internal combustion engine
T.S. Eyre, K.K. Dutta and F.A. Davis 11

Correlation between a laboratory impact – abrasion test and an *in-situ* marked-ball test
M. Fiset, G. Huard and J. Masounave 329

Design of externally pressurized gas bearings for stiffness and damping
J.W. Roblee and C.D. Mote Jr 333

Development of a prototype abrasive wear tester for tillage tool materials
H.-J. Yu and S.D. Bhole 309

EP activity evaluation of cyclic disulphides using ball bearings of different compositions
A. Bhattacharya, T. Singh and V.K. Verma 361

Elastohydrodynamic studies of circular journal bearings with non-Newtonian lubricants
R. Sinhasan and K.C. Goyal 419

Friction of Teflon-S-coated Ti-6Al-4V under conditions of oscillatory relative motion
D.J. Ligterink, G.J. Verkerke and A.W.J. de Gee 346

High temperature oxidation stability of automotive crankcase oils and their base oils
G.C. Ofunne, A.U. Maduako and C.M. Ojinnaka 407

Influence of isothermal hardening on the sliding wear behaviour of 52100 bearing steel
Y. Wang, T.C. Lei and C.Q. Gao 47

Investigation of agricultural tools with plasma-sprayed coatings
R.L. Kushwaha, L. Chi and C. Roy 297

Isothermal analysis of finite-width, partial-arc journal bearing with new upstream boundary conditions: Part 1
J.-F. Lin, H.-W. Liu and W.-L. Li 27

Liquid lubrication in space
E.V. Zaretsky 75

Mechanical wear behaviour of copper-base alloys
S.A.R. Naga, A.I. Selmy and M.A. Hassan 35

Modelling of ball bearings in spacecraft
M.J. Todd 123

New frontiers for space tribology
D. Wyn-Roberts 149

Prediction of seal life in an abrasive environment under high

Index to volume 23 1990

Liquid lubrication in space
E.V. Zaretsky 75

Mechanical wear behaviour of copper-base alloys
S.A.R. Naga, A.I. Selmy and M.A. Hassan 35

Modelling of ball bearings in spacecraft
M.J. Todd 123

New frontiers for space tribology
D. Wyn-Roberts 149

Prediction of seal life in an abrasive environment under high

pressures using finite elements
K.H. Means and C. Gerhard 3

Self-lubricating polymer composites and polymer transfer film lubrication for space applications
R.L. Fusaro 105

Sliding friction and wear behaviour of several nickel aluminide alloys under dry and lubricated conditions
P.J. Blau and C.E. DeVore 226

Solid particle erosion of titanium nitride coated high speed steel
P. Hedenqvist and M. Olsson 173

Space tribology activity in India
B. Kanaka Raju and N. Vedachalam 139

Surface hardening by ball burnishing
N.H. Loh, S.C. Tam and S. Miyazawa 413

The effect of a friction modifier on piston ring and cylinder bore friction and wear
F.A. Davis and T.S. Eyre 163

The effect of water on the acid-base properties of new and used IC engine lubricating oils
M.F. Fox, J.D. Picken and Z. Pawlak 183

The measurement of in-situ wear of video heads
L.A. Reeves and J.L. Sullivan 251

The stiffness and modification of helical W-N gear teeth under thermal EHL
J.-B. Yang and C.-W. Chen 259

The wear resistance of polymers
H. Böhm, S. Betz and A. Ball 399

Theoretical and experimental investigations of a variable-impedance hydrodynamic bearing
M.J. Goodwin, T. Boroomand and C.J. Hooke 391

Thermohydrodynamic analysis of finite-width, partial-arc journal bearings with non-Newtonian lubricants: Part II
J.-F. Lin and L.-Y. Wang 211

Thin solid lubricant films in space
E.W. Roberts 95

Transient response of a journal supported on elastic bearings
S.C. Jain, R. Sinhasan and S.C. Pilli 201

Tribological performance of MoS_2-B_2O_3 compacts
C.J. Klenke 23

Tribological properties of nitrogen-implanted GCr15 bearing steel and 40Cr structural steel
Li Hong, Zhang Zong-Cheng, Chen Xiao and Liu Xing-Huai 245

Two-dimensional flows in gas hydrostatic bearings in thin films of variable thickness analysed by finite element method
J.-F. Lin, J.-C. Jou and G.-S. Lu 351

Unlubricated sliding friction and wear of various Si_3N_4 pairs between 22° and 1000°C
A. Skopp, M. Woydt and K.-H. Habig 189

Wear studies using acoustic emission techniques
R.J. Boness, S.L. McBride and M. Sobczyk 291

Wear-resistant hard titanium carbide coatings for space applications
H.J. Boving and H.E. Hintermann 129

Why space tribology?
H.M. Briscoe 67
